Client-Cert HTTP Header Field

<https://datatracker.ietf.org/doc/draft-ietf-httpbis-client-cert-field/>

“slides should focus on issues / questions / topics of discussion for the group; assume people have read your draft.”

– mnot

- Oct 19: draft-ietf-httpbis-client-cert-field-03
 - State that the certificate chain is in the same order as defined in TLS (rather than copying the language from TLS)
 - Update references for HTTP Semantics, HTTP/3, and QPACK to point to now RFCs 9110/9114/9204
 - HTTP Semantics now a normative reference
 - Mention that origin server access control decisions can be conveyed by selecting response content or with a 403
- Oct 30: Working Group Last Call
