Resumable Uploads

Draft-01 is published

Server-generated upload URLs replacing client-generated tokens

`Upload-Incomplete: ?0` for advertising client support

tusdotnet server experimental support

Apple is investigating client implementations

How does the client advertise support? ([#2243](#), [#2295](#))

Expect header 👎

Prefer header ❓

New header ❓

    `Upload-Incomplete` 🙁

    `Upload-Complete` ❓

Differentiating error response from upload vs error response from origin ([#2312](#))

If the client receives a 5xx response from the Upload Creation Procedure or the Upload Appending Procedure, does it retry?

- `Upload-Complete` should be required on all server responses
- `Upload-Complete: ?1` means the client doesn't retry
